| **Thursday, Oct. 11** | **Dental Implant Track** | Dental Implant Plenary Session: Current State of the Art with Historical Perspective on Grafting and Navigation | • Utilizing Technology to Manage Implant Complications and Esthetic Concerns for Both the Surgeon and the Restorative Dentist  
• Crestal Approach for Sinus Augmentation  
• Vertical Bone Augmentation  
• Horizontal Bone Augmentation  
• Clinical Versatility of the Zygomatic Implant  |
|              |                     |                                                             | Abstract Session                                                                                   |
|              | **Pediatrics and Cleft Track** | Pediatrics and Cleft Plenary Session: A Century Old Family Tree and Branches of the Future | • The Use of the EXIT Procedure in Congenital Anomalies  
• Fellowship Program Showcase: Creative Techniques Case Presentations  
• Pediatrics and Cleft Breakout: Orthognathic Surgery in the Cleft Patient  
• Pearls and Pitfalls to Free Flap Reconstruction in the Pediatric Population  
• Ensuring Safety and Managing Major Anesthetic Complications in the Pediatric Craniofacial Patient  |
|              |                     |                                                             | Abstract Session                                                                                   |
|              | **Trauma Track**    | Trauma Plenary Session: Maxillofacial Trauma Care Past, Present and Future | • Repair of Orbital Fracture: Pearls and Pitfalls  
• Pediatric Maxillofacial Trauma  
• Damage-Control Surgery of Maxillofacial War Injuries  
• Mandibular Trauma  
• A Comprehensive Review of the Management of the Orbito-zygomaticomaxillary Fracture  |
|              |                     |                                                             | Abstract Session                                                                                   |
|              | **Cosmetic and Orthognathic Surgery Track** | Cosmetic and Orthognathic Surgery Plenary Session: Past, Present and Future Perspectives in Cosmetic, Orthognathic Surgery and OSA | • Complete Digital Platform for Orthognathic Surgery  
• Surgical Treatment of OSA  
• Comprehensive Cosmetic Facial Surgery  
• Sequencing in Orthognathic Surgery  
• Cosmetic Skin Care  |
|              |                     |                                                             | Abstract Session                                                                                   |
| **Friday, Oct. 12** | **Anesthesia Track** | Anesthesia Plenary Session: 100 Years of Safe Anesthetic Management of the Surgical Patient – Past, Present and Future | • Understanding Patient Safety/Minimizing Risk  
• Seeking Clearance for Office Anesthesia in a Sick Patient  
• The Prevention, Recognition and Management of Office-based Anesthesia Complications  
• Myths and Cognitive Errors in Dental Anesthesia: Avoiding Office Crises  
• Preventive Analgesia in Oral and Maxillofacial Surgery: Concepts and Applications  |
|              |                     |                                                             | Abstract Session                                                                                   |
|              | **Reconstruction Track** | Plenary Session: Emerging Technologies in Maxillofacial Nerve Injuries | • Dental Implant-related Injuries to the IAN  
• Clinical Neurosensory Testing  
• Third Molar-related IAN Injuries  
• Coronectomy to Decrease IAN Injury  
• IAN Reconstruction in Benign Disease  |
|              |                     |                                                             | Abstract Session                                                                                   |
|              | **Head and Neck Oncology Track** | Head and Neck Oncology Plenary Session: Past, Present and Future | • How I Do It: Management of Parapharyngeal Tumors  
• TORS: Transoral Robotic Surgery  
• Thyroid Parathyroid  
• How I Do It: Neck Dissection, Parotid Tumors  
• Sialoendoscopy  |
|              |                     |                                                             | Abstract Session                                                                                   |
| **Saturday, Oct. 13** | **Dentoalveolar Track** | Dentoalveolar Plenary Session: Past and Future in Dentoalveolar Surgery | • Advanced Topics in Dentoalveolar Surgery  
• Surgeons, Orthodontists and Impacted Teeth Do’s and Don’ts  
• Mandibular Third Molars and Two Vulnerable Nerves: Evidence-based Algorithm  
• Tooth Avulsion and Replantation – Where Are We Today?  
• GPS Surgery: Novel Uses and Methods of Dynamic Guided Surgery  |
|              |                     |                                                             | Abstract Session                                                                                   |
|              | **TMJ Track**       | Plenary Session: Where We Were, Where We Are and Where Are We Going? | • TMJ Replacement Device Update  
• The Use of Onabotulinum Toxin A in Myofascial, Migraine and TMJ Disorders  
• Intricacies of Planning and Placing Custom-fitted TMJ Total Joint Prostheses  
• JAA: Current Therapy  
• Pearls and Pitfalls in TMJ Arthroscopy  |
|              |                     |                                                             | Abstract Session                                                                                   |
