Stop Wasting Time on Implant Inventory

Overview
As dental implants and implant-related products become a growing part of OMS practices, management of implant inventory becomes increasingly important. This 90-minute webinar will illustrate how oral surgery practices can reduce holding implant inventory, better manage investment on implant products that may expire or never be used, and streamline ordering products for when they are actually needed.

Learning Objectives
At the conclusion of this program, participants should be able to:

1. Develop a more cost-effective and streamlined ordering process to ensure the practice has all supplies needed to run efficiently.
2. Build an inventory and reordering process to reduce expired products and waste.
3. Assess alternative online inventory management systems.

About the Speaker
Paul Bhatti, DDS, MD, FRCD(C), received his dental surgery degree from Northwestern University and his medical degree from Wayne State University School of Medicine. He completed his OMS residency at Sinai Hospital/St. Joseph Mercy Hospital.

Dr. Bhatti is founder and CEO of Sowingo, a cloud-based ecommerce and dental inventory management solution company.
