

February 22, 2021

United States House of Representatives
Washington, DC

Dear Members of the 117th Congress,

On behalf of the undersigned organizations, representing a broad range of physician and non-physician providers, congratulations on your election to the 117th Congress. Our organizations and collective memberships, representing over *one million* health care providers, remain committed to assisting Congress in the nation's recovery from the COVID-19 pandemic and implementing reforms to the Medicare system to ensure patient access and improved outcomes.

During the final days of the 116th Congress, a broad bipartisan effort helped ensure language was included in the *Consolidated Appropriations Act, 2021* (P.L. 116-260) that alleviated devastating payment cuts to providers across the health care delivery system set to take effect under the 2021 Medicare Physician Fee Schedule (MPFS). This bipartisan effort avoided significant disruptions to care for Medicare beneficiaries, reduced the level of 2021 cuts to many providers, supported small health care businesses — especially in rural and underserved areas — and provided a lifeline for health care providers who are still reeling from the impact of the current COVID-19 pandemic. Our members are truly grateful for the work of the 116th Congress that mitigated these cuts during a global pandemic.

As you begin your work in the 117th Congress, we want to call your attention to the continued critical need for reforms to the Medicare system and additional work required to resolve deficiencies in the MPFS, including addressing the budget neutrality requirement which can lead to arbitrary reductions to reimbursement unrelated to the cost of providing care. The primary goal of the MPFS must be to encourage broad participation of health care providers to deliver appropriate and timely quality care to meet the health needs of Medicare beneficiaries. A secondary goal of the fee schedule should be to reflect the modern health care delivery system in which different health care professionals work collaboratively to advance appropriate health outcomes for their patients. Unfortunately, these goals are not reflected given that there are additional scheduled deep cuts to providers who are reimbursed under the MPFS for 2022, 2023 and 2024 that will negatively impact patient care and diminish practitioners' small businesses, further slowing our nation's health and economic recovery from the pandemic. We urge Congress to consider additional policy options in the year ahead to address these shortcomings.

If you have any questions or comments related to this request, please contact Cynthia Moran (ACR, cmoran@acr.org), Katie Orrico (AANS, korrico@neurosurgery.org) or Justin Elliott (APTA, justinelliott@apta.org).

Sincerely,
