

coding certificate program

The AAOMS Coding Certificate Program offers a coding instruction series for OMSs and their staff to help *measurably reduce the time between claim submission and reimbursement*, significantly *increase the number of "clean" claims submissions* and greatly *reduce the possibility of a fraud and abuse allegation*.

The Coding Certificate Program consists of three courses:

Basic Coding for OMS

This online, introductory course is designed for those with no formal training in procedural and diagnostic coding.

Beyond the Basics Coding

Obtain coding guidance for the full scope of oral and maxillofacial surgery and practice with real-life coding challenges through this course now offered online.

OMS Billing

Focus on documentation guidelines, predetermination tips, claims filing, appeal tips, avoiding fraud and abuse, and more in this online course.

For more information, visit AAOMS.org/CCP.

*This tote bag is given to all registered attendees of the in-person Beyond the Basics Coding course.

Join an ELITE GROUP of CODING PROFESSIONALS

Once you complete all three courses, you can claim expertise in OMS coding through this unmatched, specialty-specific certificate program. Your achievement is recognized with a certificate of completion and a special lapel pin you are encouraged to wear at all AAOMS events – visible proof of your extensive knowledge of coding principles.
